

Sahayak

Team details and profiles

Team overview

Harshil Patel, Deep Mehta and Meet Kapadia are B.Tech students at the Indian Institute of Information Technology (IIIT) Vadodara. The team combines product and AI workflow design, backend and integration engineering, and multilingual worker experience and dashboard design.

Institution	Indian Institute of Information Technology (IIIT) Vadodara
Project	Sahayak - A Voice-First AI Work Assistant for India's Deskless Workforce
Current stage	Functional prototype; internally tested for the recorded hackathon demonstration

Member profiles

Harshil Patel
Product and AI pipeline

Owns product framing, requirements and the assistant workflow, including intent handling, evidence-grounded SOP responses, action confirmation and human escalation design.

Deep Mehta
Backend and integrations

Owns backend services, data flows and the integration plan for HRMS records, leave approvals, audit logs, messaging channels and production infrastructure.

Meet Kapadia
Voice UX and dashboard

Owns the multilingual worker experience and supervisor view, including Indic speech evaluation planning, code-switching flows, training-gap analytics and operational usability.

Role boundaries describe the team's planned ownership for Sahayak. Pilot partnerships and live enterprise integrations have not yet been claimed.
